

# EUROPEAN TECHNOLOGY INHERITANCE OF CLASSICS

**CARLOS ELEVATOR W.L.L.**  
TECHNOLOGY U CAN TRUST

# Company profile

Carlos Elevator Company based in Bahrain with a joint venture with R.K industries one of the fastest growing economies in India. This division is supported by a team of highly skilled and qualified engineers, technicians and office support staff who oversee all stages of the Design, Supply, Installation, Modernization, Commissioning and Maintenance of Elevators, Escalators and Moving Walks. About Carlos Elevator Company:

- Carlos Elevator and Escalator Company is among the best Lifts manufacturers of Lifts in India providing Indo-European Technology.
- Our company was founded in 1995 in Kolkata (Howrah) as well as being India's fastest growing city, with 10 branches in India and overseas branches (Bahrain - Kenya - Nepal - Saudi Arabia - Bangladesh - South Africa)
- We have over 100 well qualified and dedicated team, which include management executives, highly qualified and well experienced engineers and very hardworking factory workforce involved in research and development for the organization.
- Carlos Elevator and Escalator existing Unit has a manufacturing capacity of 1000 lifts per year. We have installed more than 20000+ elevators.
- Official Partner: Fuji Elevators & Escalators Suzhou Co., Ltd - From China

# Advanced equipment

Committed to excellent service to provide perfect quality for the building  
Total traffic solution for absolute safety  
Become a leader enterprise recognized by the society

# Small machine room elevator

FUJI LIFT small machine room passenger elevator applies the rational construction layout. Machine room is about the same as the well size. It effectively saves the occupation rate of machine room space. Small machine room designer grants the elevator to more easily merge with the building. It greatly reduces the restrictions of the building outline design. It reduces the building space cost. What is more, it inspires infinite creativity of the building designers.

## Design easily and freely enters into numerous buildings

Small machine room passenger elevator series merges with modern high-tech elite. It accords with the idea of optimizing modern building layout. It fulfills the uniformity between machine room and the well area. It thus greatly saves the building cost and satisfies the requirements from countless buildings. It advocates an individual life concept.

## Environment protection type traction system with fierce motives

It applies small bulk, light weight, high drive efficiency permanent magnet synchronous and gearless traction machine. Its area is only half of the traditional traction machine. It thus greatly reduces the machine room area. It fulfills a key step of small machine room design.

## Compact control cabinet with abundant strength

It applies small machine room special-purpose thin control cabinet. It is more compact in structure and more slender in outline. It effectively saves the well space and enhances the utilization rate of the building space.

# Machine roomless elevator

FUJI machine roomless passenger elevator, with an environment concern, saves energy and reduces the consumption, saves the construction area and increases the freedom of designers, thereby fully reflecting the idea of environment-friendly culture. Compared with the gearwheel elevators with the same load capacity, machine roomless elevators save 25% electricity and 10% of construction area. FUJI machine roomless passenger elevator has broken through the prerequisite that machine rooms must be available for elevators, providing limitless possibilities of creation for the limited space of modern construction.

## Blended into the construction, easily and leisurely

FUJI machine roomless passenger elevator need only one independent hoist-way and do not need the presence of machine rooms. The architects and developers are allowed to conduct designing in a freer way.

## Saving the costs for construction

FUJI machine roomless passenger elevator take less space, which enables you to effectively utilize the construction space. installation ensures affect freedom to the engineering caused by the installation of elevators.

Traditional computer room

Less Room, Less Cost

## 100% utilization rate of building space

It integrates machine room and the well into one. It properly installs the traction machine and control cabinet into the well. It saves the space cost for the building and fulfills 100% high utilization rate of the building space.

# PANORAMIC ELEVATOR

## Space-creating fulfills great splendors

It applies highly secure laminated glass cabin wall material. It prevents from energy loss with effective sound-isolation. It adopts large-area cabin wall glass to create the best sight-seeing vision. It is smooth in outline design. It adds infinite beauty and charm for the building in the travel process.

Semi-circular

Square

Cutting-angle

Bulb

Various types of cabin are available for your choice and meet different needs.  
The overstriking line in each picture is transparent safety glass.

# Hospital-Bed Elevator

In order to meet the requirements of delivering emergency patients, it applies human-centered design. It is equipped with a full set of top grade equipment with smooth and comfortable running, broad and bright elevator car. It not only has ordinary passenger transport functions. Furthermore, it can hold stretcher. Meanwhile, it offers great convenience for people to carry big furniture.

FUJI hospital elevator tailor-makes your building. It applies high strength section material to make the elevator car. It can load various kinds of heavy stretchers. It safely delivers patients or big things. It efficiently protects security for both people and goods.

## Space ultraviolet sterilization

UV technology, for armrest, car wall, and car space comprehensive disinfection, infrared induction and other multiple safety modes, effective sterilization up to 99%, effective prevention of virus cross transmission, making elevator space more secure.

## Zero-contact intellectual induction

It applies capacitance type non-contact long-distance induction mode. It fulfills 5mm for effective induction distance. It prevents finger from touching press button. It thus greatly reduces virus infection because of finger touch in elevator use. It also prolongs the service life of elevator press-buttons.

## Multiple Available Door-opening Modes

Central opening

Side opening

Opposite side opening

# Elevator function

## Standard function

Travel function

VVVF drive	Motor rotating speed can be precisely adjusted to get smooth speed curve in elevator start, travel and stop and gain the sound comfort.
VVVF door operator	Motor rotating speed can be precisely adjusted to get the more gentle and sensitive door machine start / stop.
Independent running	The elevator can not respond to outer calling, but only respond to the command inside the cabin through the action switch.
Automatic pass without stop	When the cabin is crowded with the passengers or the load is close to preset value, the cabin will automatically pass the calling landing in order to keep maximum travel efficiency.
Automatically adjust door opening time	Door-open time can be automatically adjusted according to the difference between landing calling and cabin calling.
Reopen with hall call	In the door shutting process, press reopen with hall call button can restart the door.
Express door closing	When the elevator stops and opens the door, press door-shut button, the door will be closed immediately.
Cabin stop and door open	The elevator decelerates and levels, the door only opens after the elevator comes to a complete stop.
Cabin arrival gong	Arrival gong in the cabin top announces that the passengers arrive.
Command register cancel	If you press the wrong floor command button in the cabin, twice continuous pressing of same button can cancel the registered command.

Safety function

Photocell protection	In the door open and shut period, infrared light that covers the whole door height is used to probe the door protection device of both the passengers and objects.
Designated stop	If the life can not open the door in the destination floor out of some reason, the elevator will close the door and travel to the nex designated floor.
Overload holding stop	When the cabin is overload, the buzzer rings and stops the elevator in the floor.
Anti-stall timer protection	The elevator stops operation due to slippery traction wire rope.
Start protection control	If the elevator does not leave door zone within the designated time after it gets started, it will stop the operation.
Inspection operation	When the elevator enter into inspection, the cabin travels at inching running.
Fault self-diagnosis	The controller can record 62 latest troubles so as to quickly remove the trouble and restore the elevator operation.
Repeated door closing	If the elevator can not close the door due to certain obstacle or interference, the elevator will reopen or re-shut the door until sundries are eliminated.
Up/down over-run and final limit protection	The device can effectively prevent from the elevator's surging to the top or knocking the bottom when it is out of the control. It results in the more safer and reliable elevator travel.
Up over-speed protection device	When the elevator ups 1.2 times higher than rated speed, the device will automatically decelerate or brake the elevator.
Down over-speed protection device	When the elevator downs 1.2 times higher than the rated speed, this device will automatically cut off control mains, stop the motor running so as to stop elevator down at over-speed, and the speed is 1.4 times higher than rated speed, safety gears act to force the elevator stop in order to ensure the safety.

Man-machine interface

Micro-touch button for cabin call and hall call	Novel micro-touch button is used for opeartion panel command button in the cabin and landing calling button.
Floor and direction indicator inside cabin	The cabin shows the elevator floor location and current travel direction.

Emergency function

Floor and direction indicator	The landing shows the elevator floor location and current travel direction.
Emergency cabin lighting	Emergency cabin lighting automatically activated once power failure.
Inching running	When the elevator enters into emergency electric operation, the cabin travels at low speed inching running.
Five-way intercom	Communication amid cabin, cabin top, elevator machine room, well pit and rescue duty room through walkie-talkie.

Energy-saving function

Bell	In emergency conditions, if bell button above cabin operation panel is continuously pressed, electric bell rings on top of the cabin.
Fire emergency return	If you start key switch in main landing or monitor screen, all the calling will be cancelled. The elevator directly and immediately drives to the designated rescue landing and automatically opens the door.
Cabin ventilation, light automatic shut-off	If there is no calling or command signal within the stipulated time, the cabin fan and lighting will be automatically closed in order to save the energy.
Remote shut-off	The elevator can be called to main landing (after finishing the service) through the key switch and automatically exists the service.

## Optional function

Emergency function

Leveling when power failure	In normal power failure, the chargeable battery supplies the elevator power. The elevator drives to the nearest landing.
-----------------------------	--

Anti-nuisance	In the light elevator load, when three more commands appear, in order to avoid the unnecessary parking, all the registered callings in the cabin will be cancelled.
---------------	---

Open the door in advance	When the elevator decelerates and enters into door open zone, it automatically opens the door to enhance the travel efficiency.
--------------------------	---

Direct parking	It completely accords with distance principle with no crawling in the leveling. It greatly enhance the travel efficiency.
----------------	---

Travel function

Group control function	When three or more same model elevator groups are controlled in use, the elevator group can automatically choose the most appropriate response. It avoids the repeated elevator parking, reduces the passenger's waiting time and increases the travel efficiency.
------------------------	--

Duplex control	Two sets of same model elevators can unanimously respond the calling signal through the computer dispatch. In this way, it reduces the passenger's waiting time to the greatest extent and enhances the travel efficiency as well.
----------------	--

On-duty peak service	Within the preset on-duty time, upward transport from the home landing is extremely busy. The elevators are continuously dispatched to the home landing in order to satisfy on-duty peak service.
----------------------	---

Off-duty peak service	Within the preset off-duty period, the elevators are continuously dispatched to top floor in order to satisfy off-duty peak service.
-----------------------	--

Door open time extending	Press special button in the cabin, the elevator door keeps open for certain period of time.
--------------------------	---

Man-machine interface

Voice announcer	When the elevator normally arrives, voice announcer informs the passengers about the relevant information.
-----------------	--

Cabin assistant operation box	It is used in the large loading weight elevators or the elevators with crowded passengers so that more and more passengers can use the cabin.
-------------------------------	---

Operation box for the handicapped	It is convenient for the wheelchair passengers and those who have vision problems.
-----------------------------------	--

Intelligent calling service	The cabin command or hoistway calling can be locked or connected through special intelligent input.
-----------------------------	---

IC card control function	All (partial) landings can only input cabin commands through IC card after the authorization.
--------------------------	---

Monitor function

Remote monitor	The elevator long-distance monitor and control can be fulfilled through modem and telephone. It is convenient for the factories and service units to timely know the travel conditions of every elevator and promptly take the corresponding measures.
----------------	--

Remote control	The elevator can have independent travel according to the specific requirements through operation monitor screen (optional).
----------------	--

Camera function in the cabin	The camera is installed in the cabin to monitor the cabin conditions.
------------------------------	---

# Freight elevator

In logistics field, FUJI freight elevator gets perfect development in order to satisfy goods transport requirements in factory, warehouse, shopping center, supermarket, airport, bus station etc.

FUJI elevators have wide varieties. Loading ranges from 1000kg to 5000kg.

Over the years, it lays technical and manufacture advantages of “energy-saving, safe, constant, accurate” .

It fulfills efficient and human-centered services for vast users.

## Firm and durable elevator car

It ensures firm and durable elevator car through high strength plate bearing & forming technology. In addition, optionally specially-designed anti-collision guard-rail executes multi-protections to elevator car.

## Large opening distance

It applies multi-folded hoist-way door and car door. It fulfills maximum opening width. It is convenient for entry / exit of large goods.

## Highly accurate leveling

Leveling accuracy can be controlled within mm-level range.

## Dumbwaiter Elevator

### Flexible Space, Harmonious Transport

FUJI dumbwaiter elevator is small, exquisite and flexible with simple structure. It can easily combine with the building. It offers the prompt, convenient, economical, practical small goods vertical transport service for hotel, restaurant, bank, residence, hospital, library etc.

FUJI carefully and wholeheartedly produces service elevator according to highly secure standard. It owns absolutely nice quality and novel outline. It serves various buildings by new and diverse services. It goes all out to boost a happy life for the people. Therefore vast clients can always feel the considerate services of FUJI Elevator.

# Escalator

## Escalator

FUJI escalator applies the advanced technology, design concept for manufacture in the world. It features as smooth running, low noise, durable, convenient repair etc. It grants you to appreciate the outstanding charm and deluxe manner of modern buildings by fine and exquisite structure, consummate elevator path, delicate belt, deluxe and attractive outline. It provides the passengers with a bright, comfortable, brand-new feeling.

## Smooth delivery

It applies the advanced international technology and combines with top-class design concept. It produces durable FUJI escalators with smooth operation and low noise. It brings about the brand-new travel experience by fine and exquisite structure, consummate stairway, delicate belt, attractive and charming outline.

# MOVING WALK
